

Dr. med. Ihsan Inan MD FACS

Specialist in general and digestive surgery, expert in minimally invasive and robotic surgery

Languages

FR,EN,TR,DE

Competences

Dr Ihsan Inan is a Swiss-trained and board-certified visceral surgeon specializing in advanced minimally invasive and robotic surgery. A pioneer of robotic surgery since 2005, he focuses on hernia and abdominal wall reconstruction, hiatal hernia and reflux, colorectal, gallbladder, and oncologic surgery. Practicing at Clinique Générale-Beaulieu since 2008, he established ERAS and prehabilitation programs and promotes opioid-free robotic surgery. He actively trains and mentors international teams and serves as faculty in numerous European and global robotic surgery courses.

Work Experience

Dr Ihsan Inan is a Swiss-trained and board-certified (FMH) surgeon with a visceral subspecialty (FMH), specializing in advanced minimally invasive and robotic surgery. His main areas of focus include abdominal wall reconstruction, hiatal hernia and reflux, gallbladder, colorectal, and oncologic surgery.

A pioneer of robotic surgery since 2005, and of total practice robotic surgery since 2015, he has been instrumental in developing and refining innovative hernia repair techniques such as ventral TAPP, PeTEP, and robotic diastasis recti reconstruction, integrating them into comprehensive and reproducible clinical pathways.

With over three decades of experience spanning both the academic and private sectors, Dr Inan has practiced at Clinique Générale-Beaulieu since 2008, where he established Enhanced Recovery After Surgery (ERAS) and multimodal prehabilitation programs, and promotes opioid-free robotic surgery through the use of ultrasound-guided field blocks.

He is actively engaged in proctoring, training, and mentoring international teams in robotic hernia, abdominal wall reconstruction, colorectal, and gallbladder surgery, and serves as faculty in numerous European and global robotic surgery congresses and training programs.

Dr Inan's academic work reflected in his Google Scholar profile (h-index 17) focuses on the evolution of robotic surgery as the natural continuum of minimally invasive surgery, and on the advancement of quality-driven, patient-centered surgical excellence.

Memberships

since 2016	FACS Fellow of the American College of Surgeons
since 2013	SAGES Society of American Gastrointestinal and Endoscopic Surgeons
since 2008	American Hernia Society
since 2008	European Hernia Society
since 2008	Société médicale Beaulieu
since 2008	Association des Médecins Genevois
since 1997	Société Suisse de Chirurgie Viscérale
since 1997	EAES European Association for Endoscopic Surgery
since 1989	Swiss Medical Association (FMH)

Apprenticeship

Academic Footprint

- Citations: 1,008
- h-index: 17
- i10-index: 18
- Since 2020 ☐ h-index 8, citations 326

[Google Scholar](#)

Highlights :

- Pioneer of Inan Inverting Plication (posterior plication technique)
- 15 years of active publishing in robotic & abdominal wall surgery
- International citations across hernia, robotics, and MIS
- Contributor to EHS guidelines & multicenter research projects

Education

2005	FMH certification in abdominal surgery
1999	FMH certification in surgery
1987	Doctorate in medicine, Faculty of Medicine, Ege University, Izmir
