INFORMATION ABOUT THE PROMs SURVEY

YOUR PERSONAL ASSESSMENT IS IMPORTANT!

You will soon have a surgery. As part of your treatment plan, you will be asked to complete the PROMs (Patient Reported Outcome Measures) survey. This is used to find out how you are feeling before and after the operation.

- You will receive **links to the questionnaires by e-mail** before and one year after the operation.
- The PROMs survey is about **your personal perception of your health** in relation to the affected joint. In order to track your personal progress, you will receive the same questionnaire twice.
- The PROMs survey is intended to contribute to greater **quality transparency** and support **quality assurance** at the hospital and in the Swiss healthcare system. Your personal perception is extremely important for this.
- Your **data will be treated confidentially** and can only be viewed by your treating doctor and the hospital. You have the right to have your data relating to the PROMs survey deleted at any time.

Thank you for supporting this important survey!
